TRANSBAYKAL JUNE WEATHER CONDITIONS RECORDED -- Zabaykal'skiy Rabochiy,
No 129, 3 Jul 49

The Transbaykal region had a relatively frequent occurrence of cyclones during June simultaneously with a current of fresh continental polar air. The weather throughout the month was moderately humid and cool. Rainfall was about average (45 - 70 millimeters) in all areas, although somewhat below the norm in the southwest, in the vicinity of Krasnyy Chikoy and Kyr. The average monthly air temperature for the month was 1 - 2 degrees lower than the average temperature for June observed over many years.

Weather conditions in June in the majority of regions was completely favorable for growth agricultural crops and grasses.

The Weather Forecast Bureau predicts rain accompanied by thunderstorms for the next 2 days in the western regions (Krasnyy Chikoy, Petrovsk-Zabaykal'skiy) and somewhat cloudy without rain for 5 - 6 July; in other regions of the oblast, scattered rain and thunderstorms are predicted for 4 - 5 July. The minimum night temperature will be 10 - 16 degrees, and the maximum day temperature 24 - 30 degrees.

ESTONIAN WEATHER REPORT 5 - 19 July -- Sovetskaya Estoniya, No 157, 6 Jul 49

The Forecasting Bureau of the Administration of Hydrometeorological Service Estonian SSR reports that 5 July the weather was partly cloudy, hot, and dry, with light winds. Night temperature was 10 - 15 degrees, daytime temperature 24 - 28 degrees. Calm, hot, dry weather will continue 6 - 7 July. Local showers and thunderstorms can be expected 8 July. Daytime temperature will be 24 - 28 degrees, and temperature during the night 10 - 15 degrees.

Sovetskaya Estoniya, No 159, 8 Jul 49

There were short heavy rains, local thunderstorms, and cloudy weather on 7 July. Day temperature was slightly lower. Night temperature was generally 14 - 16 degrees, and day temperature 20 - 22 degrees.

On 8 July, there were showers with thunderstorms in some localities. Dry weather and general clearing are expected for 9 - 10 July. Wind will be northwest and west with light winds at night and moderate winds during the day. Day temperature will be 20 - 22 degrees, and night temperature 10 - 15 degrees.

Sovetskaya Estoniya, No 161, 10 Jul 49

The weather on 9 June in the western regions was clear, and in the other regions partly cloudy. There were scattered showers with fog in the night and morning. Night temperature was 13 - 16 degrees and day temperature was 18 - 21 degrees.

During the next 3 days the weather will be clear throughout the whole republic, with light to moderate north winds.

Sovetskaya Estoniya, No 162, 12 Jul 49

During the past 2 days the weather for the republic was partly cloudy, warm and dry, with light winds. Night temperature was 8 - 10 degrees and temperature during the day was 20 - 24 degrees.

During the next 3 days scattered showers may be expected. There will be light to moderate west and southwest winds. Daytime temperature will be 20 - 25 degrees, and night temperature 12 - 16 degrees.

Sovetskaya Estoniya, No 163, 13 Jul 49

The weather on 12 July throughout the republic was partly cloudy, hot and dry, with light winds. Night temperature was 10 - 15 degrees, and temperature during the day was 22 - 26 degrees.

Calm, hot, dry weather is forecast for 13 July. There will be scattered showers and thunderstorms 14 - 15 July. Temperature during the day will range from 22 to 27 degrees and during the night, from 12 to 16 degrees.

Sovetskaya Estoniya, No 164, 14 Jul 49

The weather on 13 July was cloudy, followed by light rain in some localities and a slight drop in temperature during the day. At 0900 the temperature in western regions was 15 degrees, in southern regions 20 degrees.

Variable cloudiness is expected for 14 - 16 July. There will be light showers in some places during the day, with moderate west and northwest winds. Highest daytime temperature will be 20 degrees, lowest 17 degrees; night temperature will be 10 - 14 degrees.

Sovetskaya Estoniya, No 165, 15 Jul 49

July 16 - 18 there will be no change in the weather. There is a possibility of light showers during the day, but the nights will be clear. The wind will be northwest, light at night, and moderate during the day. Temperature during the day will be 17 - 20 degrees.

Sovetskaya Estoniya, No 166, 16 Jul 49

For the past few days it has been dry and slightly cloudy with light to moderate northeast winds throughout Estonia. Night temperature dropped to 6 degrees in Tallin, Tyuri, Kuuziku, and Vil'yandi; day temperature was 17 - 21 degrees. Predominately cloudy, eventually clearing and dry weather is expected for the next 3 days. There should be a marked rise in temperature in the next 2 or 3 days.

Sovetskaya Estoniya, No 167, 17 Jul 49

On 16 July the night temperature dropped to 5 - 6 degrees and the day temperature was 17 - 20 degrees in Kuuziku, Tyuri, Vil'yandi, Tapa, and Narva.

Changing cloudiness is expected for 17 - 19 July. There will be local showers during the day, with light winds at night and moderate winds during the day. Day temperature will range from 17 to 22 degrees.

Sovetskaya Estoniya, No 168, 19 Jul 49

The weather on 18 June was hot and partly cloudy with showers in the southern regions. Night temperature was 9 - 14 degrees, and temperature during the day was 20 - 25 degrees.

Warm weather with scattered showers and thunderstorms and variable light winds is forecast for the next 3 days. Daytime temperature will be 20 - 25 degrees and night temperature will be 10 - 14 degrees.

LATVIAN WEATHER REPORT FOR 23 JUNE -- Sovetskaya Latvija, No 146, 23 Jun 49

The weather from 0900 to 2400 on 23 June was characterized by variable cloudiness and scattered, slight showers in the vicinity of Riga and on the Riga Beach, with air temperature 13 - 15 degrees. Water temperature near the Riga beach was 14 - 15 degrees and in the Daugava River 15 - 17 degrees.
